LTG 804-062

sheet stacking box

The benefit of a double-box stacker lies in the possibility of non-stop stack changes. The stacker can automatically switch delivery to the other box when the desired stack height on the pallet is reached. The sheets are carried over the stacker box by an overhead magnet system and slowed to standstill at the moment of delivery. The sheets are then supported on an air cushion as they drop onto the stack.

Technical specifications

CazProductNumber CPN	6707
Name	LTG 804-062
Year of Construction	2004
Sheet length max.	970 mm
Sheet width max.	1150 mm
