

Corima EC-07

electro-coater

Pre-owned machine consisting of: ELECTROCOATING BATH SECTION Here the ends are dipped into the lacquer solution where full coverage of any scratch in just one transit is achieved by applying a contact to the end. RINSING/BLOWING SECTION This section includes batteries of fans and air knives set to clean the ends before the lacquer is dried in the oven CURING OVEN The ends are carried through the different oven zones (pre-heating – curing – cooling) by means of chains equipped with special plastic pockets suitable for high temperature work. Curing times are preset to achieve perfect lacquer polymerisation. TOOLING 3 x 99, 3 x 73 & 1 x 52 mm; The line is working now as 3 x 99 plus 1 x 73 mm.

Technical specifications

CazProductNumber CPN	6437
Name	Corima EC-07
Tooling	52, 73 & 99 mm
Year of Construction	2007
Can shape	round
Speed (up to)	1800 ends per minute
